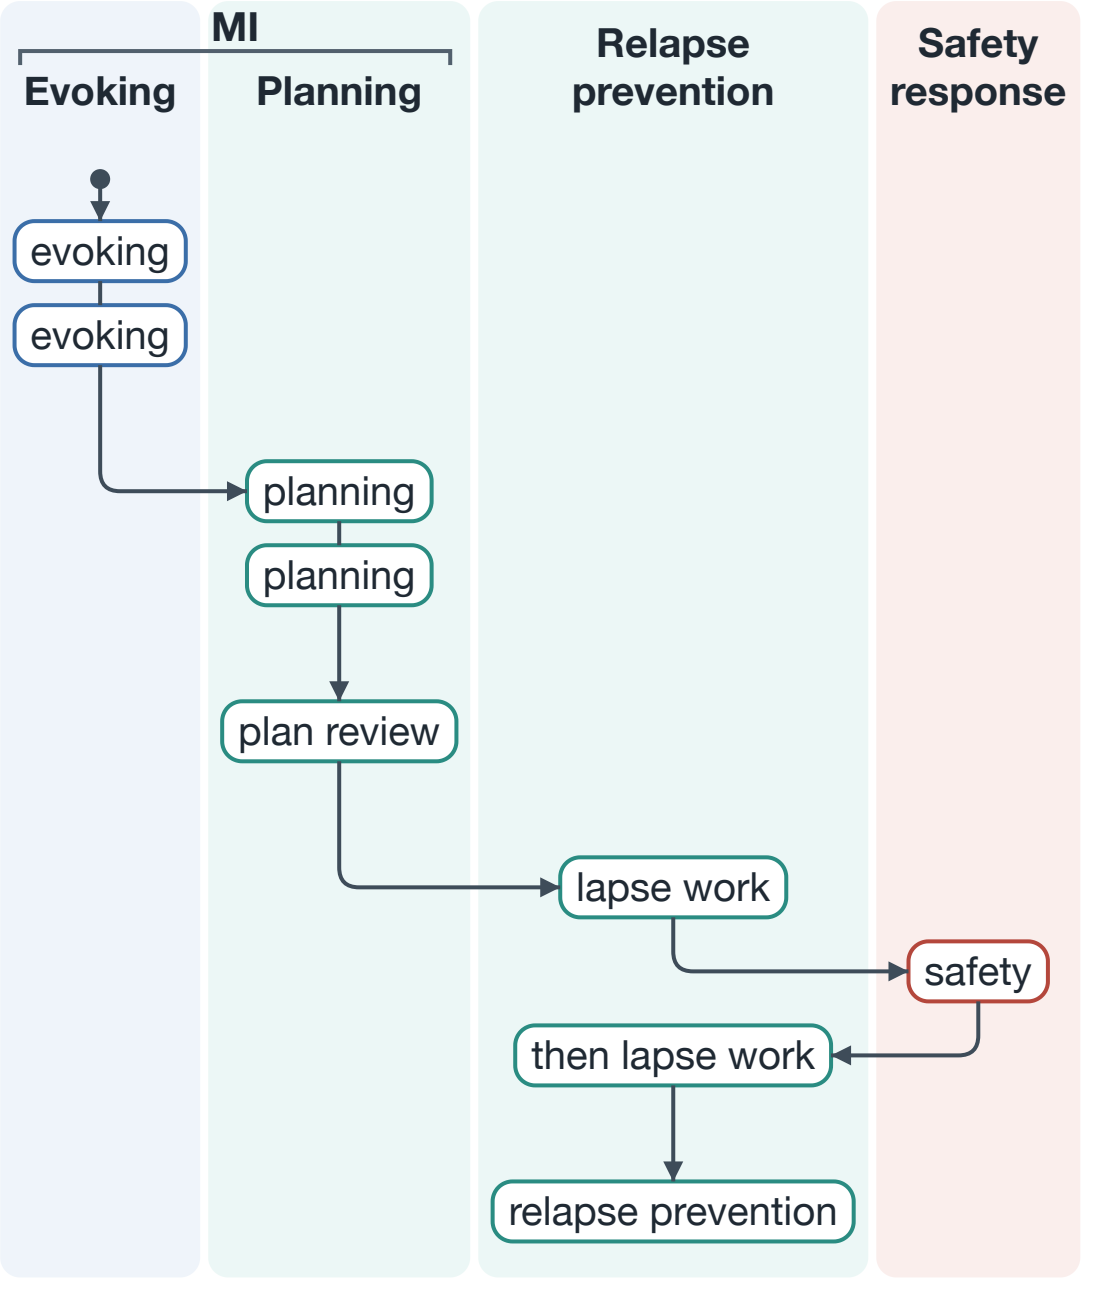
Pilot scenario: the approach expected at KM1 to KM8

Design, not results

from the scenario spec; stage is a label, never scored

	cue	her words (shortened)
S1 · Sat, Jan 31 · stage: contemplation		
KM1	boundary	*“i keep thinking i should stop”*
KM2	none	*“…helps when i'm stressed”*
S2 · Sat, Feb 7 · stage: preparation		
KM3	T1	*“…i actually want to stop.”*
KM4	none	*“which one should i get…”*
S3 · Thu, Feb 12 · stage: action, day 3 (quit day Feb 9)		
KM5	T6	*“the plan is not really working”*
S4 · Sun, Feb 22 · stage: action, lapse (slip Feb 20)		
KM6	T2	*“i'm so bad at this lol”*
KM7	T3	*“…cigarettes at parties instead?”*
		same reply: the prior approach resumes
S5 · Thu, Mar 12 · stage: action (18 days vape-free)		
KM8	T1	*“how do i not mess up again”*



→ switch, cued by her words — approach holds ● start: informing (her opening question)

cue codes from the spec: boundary, talk turns to change; T1, readiness or a request for a plan; T2, a lapse reported with discouragement; T3, risk emerges; T6, the plan is not working
